

LAGOON ROUTE IS OPENED

First Electric Train Between Salt Lake and Ogden Successfully Operated.

OFFICIALS AND SCRIBES ENJOY A BANQUET

All Electrified by Track, Cars and Flow of Oratory at Banquet.

"On the hour; every hour; in an hour!" That is the slogan of the Lagoon route between this city and Ogden. Such was the declaration of President Simon Bamberger Thursday in stating future train service to be inaugurated between the two larger cities of Utah. It was made in his speech at the banquet at Lagoon, incidental to the opening of the new electrified road, and his words were warmly applauded.

Some fifty enjoyed the hospitality of Mr. Bamberger on the initial trip of the palatial electric interurban cars to Ogden and Lagoon. The party consisted of officials of the company, those who had built it, the Falkenberg Electrical Construction company of Chicago and newspaper men from Salt Lake, Farmington and Ogden. That it was a joyous event goes without saying. Of far more importance it was decidedly an historical event in Utah's career, an epoch in the story of transportation in this state, for here is a complete 40-mile electric system built upon the most approved plans of the day and with equipment that is far and away ahead of the famed electric lines of southern California. For twenty years Mr. Bamberger has been at work upon the project of connecting Salt Lake and Ogden, and the trip on Thursday witnessed the realization of his fondest dream. It was a thoroughly successful trial trip and at its close the genial president was warmly congratulated by one and all who had enjoyed his here. Here is the technical description of the new line:

Description of the Line.

The system is an alternating current generated at the main power station located at Lagoon. This current is generated at 2200 volt, 40 cycles by 3-phase generators connected to horizontal cross-compound Corliss condensing engines, with the addition of exhaust steam turbines, by alternators running in parallel with the engine-driven generators.

This current is stepped up from 2200 volts to 45,000 volts, and transmitted north and south from Lagoon over an independent high tension transmission line owned by the railway company.

At four different points along the line this 45,000 volt high tension alternating current is carried into sub-stations where it is again reduced to 2200 volts to drive large motors in the sub-stations that are directly connected to dynamos, which deliver the 700-volt direct current supplied to the trolley and thence to the motors on the cars.

The main power station is located at Lagoon and contains, in addition to the main power station apparatus, a fully equipped high tension sub-station. At the present high tension current is supplied by the Falkenberg Power company, building, however, the apparatus in the railway company's main power station.

The sub-stations are located respectively at Stockdale, Lagoon, Clearfield and are approximately ten miles apart. Each sub-station contains elaborate and thoroughly modern high tension equipment to convert the 45,000 volt supply current to the 2200 volt current required to operate the motors driving the direct current generators, which supply the trolleys.

Each sub-station contains 1-400 k. w. motor generator set, but the station is designed to permit the addition at any time of a second motor generator set of the same size, thus giving ultimate capacity per sub-station of 800 k. w. with momentary overcapacity. The total capacity of the system is equivalent to a total sub-station normal ultimate capacity of more than 3000 k. w., with a total ultimate overcapacity of 6000 k. w.

This design will permit the traffic to quadruple itself in a considerable time, necessitating any considerable changes or additions in the present system.

Laid With Heavy Steel.

The road is laid with 85-pound rail A. S. C. E. tie section on gravel ballasted track, and all rail joints are bonded with 4-6 inch terminal tie copper bonds and the rails are cross-bonded every 600 feet with 4-6 cross bonds 5 feet long.

Overhead conductors are carried by cross suspensions supported from wooden poles, set either in concrete or trestle.

An exceptional amount of copper trolley wire and feeders is carried throughout.

ALTRO

ARRIVING AT THE LAGOON, the crowd wended its way to the vine-covered cafe, where Mine Host J. Bergerman had prepared a feast and much gaiety of the menu was enjoyed. At the coffee, Mr. Bamberger pleasantly welcomed his friends and told something of the history of the road. He was followed by almost all the other officials and representatives of the newspapers present, all the time being congratulatory to the builder of the road who, by the electrification of the line, has inaugurated the first interurban system in the state, and has turned the most important page in railroad construction.

The train returned to the city at 3 o'clock.

Railroad Notes.

It's "All aboard for Lagoon!" Bergerman, you are all right, sure.

J. M. Davis is being warmly congratulated.

And Ed Monson is going to get a warm welcome to Zion.

F. W. Easton goes up as senior assistant superintendent at Ogden.

The place is taken by F. C. Smith, who becomes assistant superintendent.

And Tom Stewardson comes to the Salt Lake route from Eureka as sales clerk in the freight department. It's a popular promotion.

President Young will start off in his career with some problems, for the dispatches tell of a race between the building of the cable route and the Copper River railroad with some glaciers. A bonus of \$100 is offered each man if the bridge is up before the ice goes out.

It is now thought that the Salt Lake route will be opened for freight traffic on June 7. P. J. Moran will be early on the ground, as he has many loads of asphalt to come up from Los Angeles.

The Pioche stage is still running from Modena. It will continue to so operate until the Pioche branch can be fixed up, which will not be long as workmen can soon be spared from the main line reconstruction.

A correspondent asks how many transcontinental roads have been lately built or are now building. Starting from the north, they are Grand Trunk Pacific, Chicago, Milwaukee & Puget Sound, Great Northern, Canadian Pacific, Mexico & Orient. The Burlington is building connecting links that will give it such a line from the Gulf to Puget sound through new combinations.

NEW METHOD OF PUNISHING "SOAKS"

CHICAGO, May 26.—Mayor A. G. Schlicker of Indian Harbor set a precedent yesterday for ridding his town of "undesirable citizens." The method consisted in sentencing Frank Hart, whose visits to the police station while intoxicated have been many, to ride handcuffed to a seat as far as his legs \$3.55 would take him on the Erie railroad out of Crown Point.

cleanses, preserves and beautifies the teeth, prevents tooth decay and imparts purity and fragrance to the breath.

The entire length of the system, aggregating 1,200,000 ft. m. cross sections of copper.

Double trolley wires have been installed, both wires at present located over the single track, but designed to permit the transfer of one wire to the second track when required, the entire system having been designed to permit of double-tracking in the near future.

A double set of independent telephone lines, owned and operated by the railway company, both for ordinary traffic and for special up-to-date dispatching service has been installed.

Some fifty enjoyed the hospitality of Mr. Bamberger on the initial trip of the palatial electric interurban cars to Ogden and Lagoon. The party consisted of officials of the company, those who had built it, the Falkenberg Electrical Construction company of Chicago and newspaper men from Salt Lake, Farmington and Ogden. That it was a joyous event goes without saying. Of far more importance it was decidedly an historical event in Utah's career, an epoch in the story of transportation in this state, for here is a complete 40-mile electric system built upon the most approved plans of the day and with equipment that is far and away ahead of the famed electric lines of southern California. It was a thoroughly successful trial trip and at its close the genial president was warmly congratulated by one and all who had enjoyed his here. Here is the technical description of the new line:

Happy Crowd of Scribes.

The party left the city at 3:15 p. m. and aboard were President Simon Bamberger, Vice President Sidney Bamberger, Secretary and Chief Clerk Joshua Beane, Consulting Engineer H. A. Strauss, who is also the vice president of the Falkenberg company, Herman Bamberger, Attorney E. B. Critchlow and W. J. Barrette, Chief Surgeon S. C. Baldwin, L. Brandberger of the Telluride Power company, Superintendent of Construction P. D. Kline, and J. Bergerman. The telegram was represented by E. A. Vanderventer, N. L. Wilson, Ray, bould; the Herald-Republican by M. A. Aldrich; the Deseret News by Ben Roberts, R. J. Jessup and James Rantoul; the Times by M. F. Cunningham, and The Tribune by its railroad representative. These made up the party.

At four different points along the line this 45,000 volt high tension alternating current is carried into sub-stations where it is again reduced to 2200 volts to drive large motors in the sub-stations that are directly connected to dynamos, which deliver the 700-volt direct current supplied to the trolley and thence to the motors on the cars.

CASINO—Fisher's vaudeville and moving pictures. Matinee, 2. Evening, 7.

SHUBERT THEATER—High-class vaudeville and moving pictures. Matinee, 2. Evening, 7.

Motion Pictures.
LUNA, ISIS, ELITE THEATERS—Motion pictures continuous performance, afternoon and evening.

You will like Aunt Mary. A great big audience fell in love with her at the Salt Lake theater on Thursday evening. And what a dear, charming woman she is! Just like the aunt you knew out at "old Aunt Mary's."

Aunt Mary who is at the Salt Lake theater is May Robson. In private life she is Mrs. Augustus H. Brown. And what a charming actress she is and how she draws you to her, makes you a child, when you grew to manhood and womanhood! How she would sympathize with you in the long ago, and how she comforted you when you became of mature years!

You leave the theater after you have seen "The Rejuvenation of Aunt Mary" a better man, a better woman. You have laughed until your sides ached; you have found a tear trickling down your eyes. Why? Because Aunt Mary was before you, not portraying a character upon the stage, but being a role, but your Aunt Mary of long ago.

You watched Aunt Mary on the stage. Her every action was natural. She is your Aunt Mary of today. The character is ideal, the portrayal by Miss Robson perfect.

It may be that Miss Robson enacted the role better than usual on Thursday. If so, there was a reason for it, for in the audience was her son, a man he is a Salt Lake, too—and in her role of Aunt Mary, when she was caring for and watching and loving her nephew Jack, she was simply showing what in real life the love she had showered upon this handsome son of hers when in the long ago she was a widow and a motherless and almost penniless, and when in her struggle with poverty two others were taken away, leaving just herself and boy. This may have been the incentive.

But, whether or not it was this, she portrayed the character of Aunt Mary better than usual. The audience was most appreciative, and they warmed up as soon as the curtain went up, and then when it fell at the end of the act, the audience called and recalled Miss Robson before the curtain.

Aunt Mary has surrounded herself with a most capable company. She is not needed to individualize. The various roles were carried out in a splendid way.

"The Rejuvenation of Aunt Mary" will be presented again tonight, Saturday matinee and Saturday night. You should see Aunt Mary.

The mission began a new week Thursday afternoon with a varied bill that contains an act for everybody—pa, ma and the kids. The Lagarda troupe, that may be one of the cleverest acts in the line of acrobatics ever presented in this city. One marvels at the dexterity and daring exhibited in the execution of the hair-raising feats performed by this troupe.

Mr. and Mrs. James R. McCann and company appear in a one-act comedy entitled "The Character of Charleston." The plot is unique in conception; the cast, in which there are five people, is well balanced, and the acting is in the title role. It would spoil the play for one who has not seen it to describe the play. Mr. McCann is ably supported by Mrs. McCann, Stephen Cornish, Corwin Luskmoor and Barton Adams.

Helm and Cousins present "The Doctor and the Patient," a light, entertaining stunt, with little action and no plot. The act gets a good hand and brings forth several good laughs.

The Carlson sisters are two pretty little girls who appear in a juvenile stunt that takes well, besides singing and dancing in a way that makes a hit.

Louise Stickney's dog and pony act is a delight for the children, as well as pleasing to the grownups. Remarkable acrobatics is shown by the little animal, and to the act is added the good looks and grace of Miss Louise herself. There is a man in the act who plays the clown, and who gets around in a remarkable manner on a pair of stilts.

Helen Carmen possesses an excellent voice and a repertoire of breezy, tuneful melodies. Her act takes well, but would take better if she would cut out some of the "rough stuff," that only gets a noise from the gallery and a frown from those who enjoy clean entertainment.

The moving pictures are unusually interesting. The program will continue through Wednesday next, with the regular daily matinees.

Belasco's "St. Elmo," at the Colonial this week, is proving its right to be known as one of the most successful dramatic productions of the season. It is pleasing to the large audiences of every performance. This week is the last time that the people of Salt Lake will have the opportunity of seeing this play, as the company in this production, as Mr. Belasco has announced that "St. Elmo" will not be sent on the road next season, owing to the fact that the associate players are presenting this week at the Daniels theater in "Pretty Peggy." The play has always been a success, and in the hands of the capable Mack-Leone company it has an added value. "Pretty Peggy" will finish out the week at the Daniels, with the customary Saturday matinee.

This week's bill at the Casino is proving more popular than ever. The wonderful mechanical doll, La Moto "Phiro," is the feature of the evening.

Hay's Hair Cream

Never Fails to Restore Gray Hair to its Natural Color and Beauty.

No matter how long it has been gray or faded. Promotes a luxuriant growth of healthy hair. Stops its falling out, and positively removes Dandruff. Keeps hair soft and glossy. Will not soil skin or linen. Will not injure your hair. Is not a dye.

31 and 50c. bottles, at druggists

Sent 2 for free by mail. (U.S. Patent Skin.) Philo Hay Spec. Co., Newark, N.J., U.S.A.

Hay's Lily White Cream beautifies the complexion, prevents wrinkles, sunburn, freckles, and all skin blemishes. Not greasy or sticky. 25c. Drug & Dept. stores. SCHRAMM-JOHNSON, Drugs, 5 Stores.

THE JOHN BOLLMAN CO., Mfrs.

no," is a sensation at every performance. In the musical comedy work by the Stroudes, the pianologue work of Miss Stroude is very clever and pictures are high class and the subject "Ramona," by Helen Hunt Jackson, is one of the most interesting things yet shown.

There will be a complete change of programmes at Manager Florence's motion picture theaters Saturday afternoon, so those desirous of seeing the present excellent bills must avail themselves of the opportunity to do so at either the morning or evening performance today. Among the many excellent features included in the programmes at present running in the picture theaters are: "Modern Railway Construction," from the Urban-Eclipse studios. This subject presents in a highly interesting manner the principal operations in railway building, the construction of handling ties and rails, laying the track being all graphically shown.

The present excellent bill at the Shubert

bert theater closes with the matinee and evening performances today, and crowded houses are anticipated for every performance. The past week has proved the greatest from a box-office standpoint since the popular playhouse has been turned into a vaudeville theater. All of the acts on the bill are features in their respective lines.

The first week's opening for the new Airplane on West Third South street, just west of Greenwald's, beginning Sunday night is entitled "The Frolics of 1910." The opening bill embraces a clever musical comedy success, in which a number of first-class comedians, pretty women and a host of bright chorus girls will take part.

An admirable bill and the regular society night attendance have combined to make the advance sale for tonight at the Orpheum unusually heavy, and the prospect is that the theater will be filled to capacity with a representative audience. With the performance Saturday night the 1909-1910 season will end.

Commander Julius A. Pratt Post No. 143, Dept. III, G. A. R.

Mr. Isaac Cook, commander of above post, Kewanee, Ill., writes: "For a long time I was bothered with backache and pains across the kidneys. About two months ago I started taking Foley Kidney Pills and soon saw they were doing just as claimed. I kept on taking them and now I am free from backache, and the painful bladder misery is all gone. I like Foley Kidney Pills so well that I have told many of my friends and comrades about them and shall recommend them at every opportunity." Schramm-Johnson, Drugs.

University Notes

W. C. Veanie, patriotic instructor of the Grand Army of the Republic of the Utah Division, will address the university students at the regular weekly chapel exercises in the assembly room this morning.

The regular semi-monthly meeting of the Scribblers' club was held Thursday afternoon. A literary programme was given and business for the year brought to a close.

The university alumni and friends will give a banquet to the members of the dramatic club and the varsity debaters this evening in the Commercial club.

The final student body meeting of the year will be held this afternoon at the close of chapel exercises. Awards will be granted to all members of the Chronicle staff, dramatic club, and the athletes who did not receive their awards earlier this year. Four new letters will be given to men who have this year made good on the track team.

A final dancing matinee is being arranged for this week by the university girls.

Today is the last day of regular class work at the university for this year. All laboratory work must be finished and the examinations handed in by this evening, as next week will be devoted entirely to examinations, a period of three hours being devoted to each subject.

The May issue of the Utah Educational Review made its appearance at the university yesterday.

HIGH SCHOOL NOTES

Principal Eaton announced in all classes Thursday that on Friday school session will close at 1 o'clock, to allow sufficient time in preparation for the afternoon examinations by the boys and girls.

Boys' gymnasium classes have been discontinued for the year.

Principal Eaton has been selected by the college entrance examination board to take charge of the college examinations, held in Salt Lake. Five high school graduates will take the examinations.

The senior boys, Thursday noon, organized into sections to act as guards for the Friday afternoon exercises.

Some of the senior students who failed in the eighth grade examinations have been given a second chance to pass their graduation. Principal Eaton said Thursday that he will not write out a certificate of graduation for any senior who fails in the examination when all questions are given out three weeks ahead.

Use Nature

by using Graefenberg Vegetable Pills for the upset stomach or torpid bowels. Made from roots and herbs only. THEY CURE. Druggists sell them.

Notice the "Travelite" Bag ads in the magazines?

The "Travelite" is a very popular bag for summer travel. It is light-made of Japanese matting. It's strong—tough fibre and well reinforced. It's "handy"—opens on the side. Good looking, too. Everything in trunks, bags and leather goods.
